“düşten gerçeğe”

Oyun, çocukların sosyal uyum, zeka ve becerilerini geliştiren, belirli bir yer ve zaman içerisinde, kendine özgü kurallarla yapılan, çocukların dinlenmelerini ve öğrenmelerini sağlayan eğlenceli bir etkinlidir.

Oyun, çocuğun isteklerini, amaçlarını anlatan, toplumsal hayatı hazırlayan en etkili araçlardandır.

Çocuğun devamlı oynama isteği, onun geleceğe yönelik hareketlerinin ifadesidir. Özellikle mücadele oyunları içinde çocuklar sürekli olarak koşmak, zıplamak, tırmanmak, çekmek, itmek, boğuşmak gibi vücut özellikleriyle mücadele etmek durumundadırlar.

Çocuk, sahip olduğu fiziksel yetenekleriyle diğer oyunculara karşı bir yarış halindedir. Bu mücadele nedeniyle yapmış olduğu hareketlilik sayesinde, öncelikle solunum, dolaşım ve sindirim sistemi olumlu etkilendir. Ayrıca iç salgı bezlerinden daha fazla salgılama yapılmasına katkıda bulunarak çocuğun gelişmesini hızlandırır.

The game is a fun activity with its own rules that develops children's social cohesion, intelligence and skills, and allows them to relax and learn in a certain place and time.

The game is one of the most effective means that describe the child's wishes and aims, and prepare them for social life.

The constant desire of a child to play is an expression of his future interests and development. Especially during competitive games, children exercise body motions like running, jumping, climbing, pulling, pushing and wrestling non-stop.

The child is in a race against other players with his physical abilities. Because of this activity, breathing, circulation and digestive system are positively affected. It also accelerates the development of the child by increasing the secretion of the glands..

“dreams come true”

3 boyutlu düşünme

Üç boyutlu halatlı sistemler, çocukların üç boyutlu düşünme, psikomotor becerilerinin denge ve kas koordinasyon sistemlerinin gelişimine çok önemli katkı sağlıyor. Yükseklik ve kendilerince risk arttıkça algıları daha açık hale gelerek daha dikkatli oluyorlar, hesaplı risk almayı öğreniyorlar. Düşüklerinde üstesinden geldikleri küçük travmalar dahi onlara ileride yaşayabilecekleri büyük travmalarla başa çıkma gücü veriyor.

Çocukların yaşlarına göre oynayacakları oyuncaklar da farklıdır. Oyun parklarındaki oyuncakların büyük çoğunluğu 1-3 yaş aralığındaki çocuklara daha uygun olması nedeniyle

3 yaş ve üzeri çocukların hiçbirini bu oyuncaklarda sağlıklı bir şekilde oynayamıyor, enerjilerini atabilmek için oyuncağı tehlikeli bir şekilde kullanmaya başlıyor ve arkasından vandalizme kadar varan sonuçlar meydana geliyor.

Çocukları aşırı korumacılıkla fanusların içinde yetiştirmeye çalıştığımızda; bizlerin olmadığı ortamlarda bulunduklarında sudan çıkışmış balık oluorlar. Amacımızın; kendine güvenen, güçlüklerle başa çıkabilen sağlıklı bireyler yetiştirmek olduğu asla unutulmamalı.

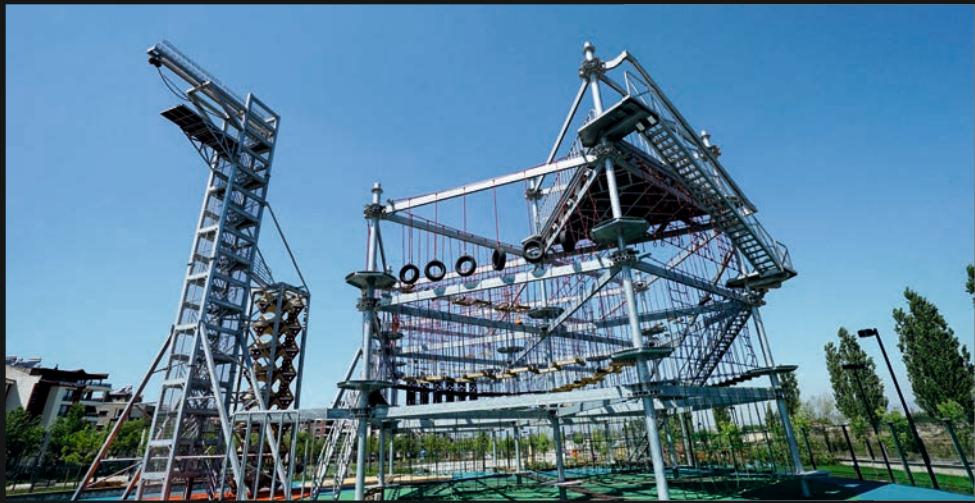

3-Dimensional rope systems significantly contribute to the development of children's 3D thinking, psycho-motor skills, balance and muscular coordination systems. As the risks and heights increase, the senses sharpen, they become more careful and learn to take risks. When they fall, they sometimes experience petty traumas that they overcome but these struggles and experience they deal with give them the power to deal with the major traumas they may experience in the future.

The toys that children play differ in depending on age. When the toys in a playground are designed for children aged 1 to 3 years old, which is the case for most of the parks, the rest of the children cannot play with them in a healthy way and they start to use the toy in a dangerous way to release their energy, leading to serious consequences including vandalism. When parents try to raise children with excessive protectionism; they are like fish out of water in environments where they are not with their parents. It should never be forgotten that our goal is to raise self-confident, healthy individuals who can cope with difficulties.

2-12 yaş grubu çocukların motor kas becerilerini ve rekabetçi yanlarının ortaya çıkarılması amacıyla; belirlenmiş zorluklardaki tasarım çalışması üçgen, kare ve beşgen olmak üzere üç farklı geometrideki platformlardan oluşan, çadır görünümlü konstrüksyonlardan oluşmaktadır.

Yerküre ve balta girmemiş orman teması konsepti farklı geometrik şekillerdeki, ağırlıklı ip köprü ve tırmanmalardan oluşan farklı yüksekliklerdeki krom kaydıraklı, 2-12 yaş çocukları hedef alan oyun grubu çalışmasıdır.

Our designs in different difficulty levels, that promote motor muscle skills and competitive side of children in age group 12, consist of platforms in 3 different geometry like triangle, square and pentagon with a tent-like look.

It is a game group study consisting of different geometric shapes with jungle and earth concepts, mainly rope bridges and climbers, with chrome slides at different heights, targeting children between 2-12 years.

Cadı serisi çocukların fiziksel ve zihinsel gelişiminde büyük rolü bulunan tırmanma fonksiyonu üzerine kurulan bir ürün serisidir.

Çocukların keşfetme merakı üzerine gidilmiş ve bu amaçla cadı teması ve cadı evi konseptleri kullanılmıştır.

Cadı evi hissiyatı yaratmak amacıyla ürün üzerine işlenen grafikler temayı pekiştirmeye etki yapacak şekilde tasarlanmıştır ve ürünlerde yer almışlardır.

Witch series is a product group based on the climbing function which plays a major role in children's physical and mental development. It aims to attract children's curiosity to discover thus witch theme and witch house concepts were used for this purpose.

In order to create the sensation of a witch house, the graphics on the product are designed and produced in a way to support the theme.

+7 yaş çocukların standart oyun parkı mantığından uzaklaştırarak oynarken keşfetme arzularını ortaya çıkarmayı hedefleyen, deniz yaşamından esinlenerek tasarlanmış modüler ve çok fonksiyonlu dış mekan oyun parkı ekipmanıdır .

Deniz yaşamının kaotik estetiğini konstrüksiyon yapısına aktarıldığı yeni nesil oyun parkı konsepti; platform mantığının yerini boşlukların, ağ örgü yüzeylerin ve konstrüksiyonun aldığı, zemin yüzeyini kubbemiş yapısı ile çevreleyen, kullanıcıya yeterli hareket boşluğu ile birlikte farklı eksenlerde hareket imkanı sağlayan, her oynamışta yeni bir kurgunun yaratılabilceği ve hayal gücünü tetikleyebilecek bir oyun ortamı sunmayı amaçlamaktadır.

This series is a modular and multifunctional outdoor playground equipment designed with the inspiration of marine life, aiming to reveal children's desire to discover by moving away from the standard playground logic.

The new generation game park concept in which the chaotic beauty of marine life is incorporated into the construction structure; It aims to provide a play environment where space and nets takes the place of constructions, ground surface is surrounded by a dome-like structure, the user is provided with sufficient movement space and ability to move in different axis, a new fantasy can created every-time it is played and imagination is triggered.

The logo features the word "CMR" in a large, dark gray sans-serif font. To the right of "CMR" is a stylized yellow graphic element resembling a person in motion, with a small circle at the top and two intersecting diagonal lines forming a dynamic shape. To the right of this graphic, the word "ACTIVE" is written in a large, bold, yellow sans-serif font. A registered trademark symbol (®) is positioned in the top right corner of the "E".

X- ergonom fitness, kullanıcıları ürünün fonksiyonlarıyla en iyi şekilde buluşturmak amacıyla tasarlanmış dış mekan spor aletleri serisidir. Ürünler ergonomik açıdan kullanıcıyı en iyi şekilde destekleyecek ve aktivitelerin mümkün olan en doğru halleriyle yapılmasını sağlayacak biçimde konunun uzmanlarıyla birlikte çalışılarak tasarlanmıştır. Mevcut fitness ekipmanlarına göre yeni fonksiyonları sayesinde spor deneyimini dış mekanda en doyurucu biçimde yaşatmayı amaçlayan bir ürün grubudur. Serinin tasarımlarında kullanılan dinamik ve modern çizgileri sayesinde kentin bir parçası gibidir.

X-ergonomic fitness is a range of outdoor sports equipment designed to allow the users fully enjoy the product's functions. The products have been designed in co-operation with the experts in the best way to support the user ergonomically and ensure that activities and movements are performed correctly even by new users. It is a product group that aims to provide the most satisfying outdoor fitness experience thanks to its new functions. It perfectly blends in with the landscape of modern cities thanks to the dynamic and modern design of the series.

Key Sketch

MODERNO URBAN EQUIPMENT/ MODERNO KENT EKİPMANLARI

PRECAST / PRECAST

Prekast; beyaz çimento, silis kumu, alkali dayanıklı cam elyafi ve suyun doğru oranlarda karıştırılarak yeniden kullanılabilir kalıba dökülmesi veya dökündükten sonra kürlenene kadar şekil alabileceği bir ortamda dökülecek, monte edileceği yere taşınması işlemidir. Prekast beton üretiminde çevresel faktörler kontrol altında tutulabilir. Fabrika ortamında optimum sıcaklık, nem vb. beton için gerekli olan ortam sağlanır. Prekast beton dökümünün, standart beton dökümüne göre çok sayıda avantajı bulunmaktadır. Fabrika ortamında döküm yapıldığı için ürün kalitesi, işçilik en iyi şekilde kontrol edilebilir. Prekast malzemesi, dış etkenlere karşı oldukça dayanıklıdır. Isı ve ses geçirgenliği düşüktür. A1 sınıfı yanmaz malzemeden üretiltiği için yanın yönetmeliğine uygundur.

The precast is a process in which white cement, silica sand, alkali-resistant fiber glass and water are mixed at the right proportions and poured into re-usable molds or poured in an environment where they can form before moving to the place to be mounted. Environmental factors in precast concrete production can be controlled. In the factory environment, the necessary conditions such as optimum temperature, humidity etc. is provided for concrete. Precast concrete casting has many advantages more than standard concrete casting. Product quality and workmanship can be controlled in the best way since it is cast in the factory environment. Precast material is very resistant to external factors. Heat and sound permeability is low. Since produced by non-combustible materials, it is suitable for fire control.

GRC / GRC

Glass fiber Reinforcement Concrete (Camelyaf Takviyeli Beton) GRC; silis kumu, beyaz çimento karışımı, 10-15 mm kalınlığındaki alkaliye dayanıklı cam elyafi ve polimer katkılı olarak, özel kalıplara püskürtme suretiyle dökülmeye üretilen üstün özellikli betondur. Gerektiği takdirde püskürtme işlemi karkas üzerine yapılarak statik ve boyutlar artırılabilir. Betondan daha dayanıklı ve hafifdir. Doğa koşullarından etkilenmez. Darbe ve aşınma mukavemetinin yüksektir. Su, ısı ve ses geçirgenliklerinin düşüktür. İstenirse boyanmaya elverişlidir. Hafif olmasından dolayı, montajı hızlı ve kolaydır. Yangına dayanaklıdır.

Glass fiber Reinforcement Concrete GRC; is a high quality concrete which is produced with the addition of silica sand, white cement mixture, 10-15 mm thick alkaline resistant glass fiber and polymer by casting and spraying into the special moulds. If necessary, the spraying process is applied on the carcass, thus the static and dimensions can be increased. This is more durable and lighter than concrete. It is not affected by the natural conditions. Impact and wear resistance is high. The permeability of water, temperature and sound is low. If desired, it is suitable for painting. Due to its light weight, it is fast and easy to install. It is fire-resistant.

SAPELLİ / SAPELLI

Sapelli değişen hava koşullarına karşı yüksek dayanım gösteren, çatlamadan ve çarpılmadan iyi kuruyan sıkı yapılı bir ağaçtır. Tam kuru özgül ağırlığı 0,62 gr/cm 3, havakurusu özgül ağırlığı: 0,60-0,75 gr/cm 3'tür. Fazla esnemeyen Sapelli'nin işlenmeye elverişliliği kolay ve temizdir. Çok iyi cılıalanabilir ve boyanmaya uygun ağaçlardandır. Böcekler ve mikroorganizmalar tarafından kolay zarar verilemez.

Sapelli is tree with a dense structure that shows high resistance to changing weather conditions and dries quickly without cracking or distorting. Its absolute dry specific weight is 0,62 g/cm 3, air-dried specific weight is 0,60-0,75 g/cm 3. Sapelli, which does not stretch much, is easy to clean and process. They can be polished very well and is suitable for painting. It cannot be damaged by insects and microorganisms easily.

ÇAM / PINE

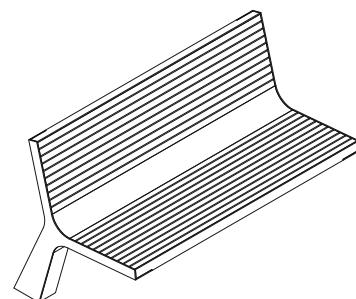

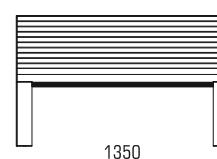

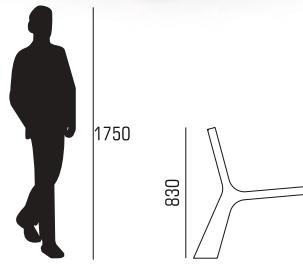

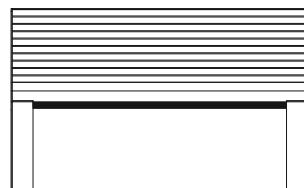

1.sınıf kalitede fırınlanmış olarak kullanılan sarıçam veya karaçam beyaz çamla kıyaslandığından ortam ve hava koşullarına çok daha dayanıklıdır. Nem oranı %10-12 arasındadır. Çürük veya kaynamış budak bulunmamaktadır. Parça boyutunun 1/20 sini geçen yan ve yüzey çatlağı, renklenme, halka çatlakları, iç kabuk, çürük kovuk, böcek deliği, reçine kesesi, sulama (yalpaklık) vb. bulunmamaktadır. Üzerine her türlü ahşap uygulaması yapılması ve renklendirmeye uygundur.

The yellow pine or black pine, used as first class and oven-dried, is much more resistant to environment and weather conditions compared to white pine. Humidity rate is 10-12%. There is no decayed or joined knurl. There are no side and surface cracks, coloring, ring cracks, inner bark, decayed cavities, insect pits, resinocysts, irrigation (coves) etc. exceeding 1/20 of the piece size. It is suitable for all kinds of wooden application and coloring.

BUMERANG / BUMERANG
 Beton / Concrete

Bumerang, 2 farklı modül olarak düşünülmüş birbirini takip eden tasarım çizgisine sahip beton kent ekipmanı serisidir. Bumerang serisinde; kullanıcıların, ortak bir alanda buluşmalarını sağlayan ve gruplara sosyalleşme alanı yaratan bir ürün ailesi oluşturmayı hedefledik. Ön gördüğümüz üç modül isteğe ve koşullara bağlı olarak sayıca çoğaltılabılır. Bu sayede yaratılmak istenen alana uygun olarak farklı kombinasyonlarda kullanılabilir.

Bumerang series are the concrete urban equipment that made up with two different modules (multipliable) that formed consecutively. In this series, we aimed to design a product group that offers users the opportunity to meet and socialize in the communal areas. Different combinations are available depending on the number of modules.

MODÜLER SERİ / MODULAR SERIES
 Beton / Concrete

Modüler serisi; anlamına uygun olarak, birbirlerine eklenebilen ürünlerden oluşan kent ekipmanları serisidir. Minimal çizgileri taşıyan bu tasarımımızdaki ana hedef toplu kullanım alanları yaratmak ve kübik formları işlevselleştirdip oluşan boşlukları değerlendirmektir. İstenilen alanda peyzaja uygun olarak, ihtiyaca yönelik farklı kombinasyonlara imkan kılan böylelikle çeşitlilik sağlayan bir ürün grubudur.

Modular series , in conformity with its meaning, are the urban equipments that can be combined with each other. Main purpose of this design work is to create communal areas with the functionalization of cubic forms to use the resultant gaps. Modular series give the opportunity to make different combinations in accordance with the landscape of workspace and the need of usage.

≥ 3 m	90 mm	500 x 500 mm

Kritik düşme yüksekliği test noktaları Critical Fall Height Test Points

* EN 1177 standartına uygundur.

*Tiles are in conformity with EN 1177 standards.

Yeni nesil ve interaktif oyun gruplarının, klasik oyun gruplarına göre düşme yükseklik riskleri fazladır. Dolayısı ile yeni nesil oyun gruplarındaki kritik düşme yüksekliğine uygun, standartların öngördüğü maximum darbe emici özelliğe sahip zemin kaplaması yapılmalıdır. Türkiye'de ilk ve tek üretilen bu kauçuk modeli ile 3 m ve üzeri kritik düşme yüksekliği karşılanabilmektedir.

New generation and interactive game groups have a higher risk of fall height than traditional game groups. Therefore, a floor cover which is appropriate for the critical fall height of new generation game groups and meets the maximum shock-absorbing criteria set forth by the standards, is essential. With this new rubber design, standards for 3 meters and higher fall height can be met.

DÖKME KAUÇUK / EPDM RUBBER

İstenilen kauçuk zemin kaplama malzemesi hem asfalt hem de beton zemin üzerine uygulanabilir. Su geçirimli, top ile oynanan bütün spor dalları ve yürüyüş yolları için uygun ve uzun ömürlü bir zemin kaplama malzemesidir.

Desired rubber floor covering material can be applied both on concrete and asphalt. It is a long-lasting floor covering material that is permeable to water, and suitable for running paths and all sports played with ball.

YÜKSEK VE DÜŞÜK DİRENÇLİ ZEMİN DÖŞEMESİ/ HIGH AND LOW RESISTANCE FLOOR COVERING

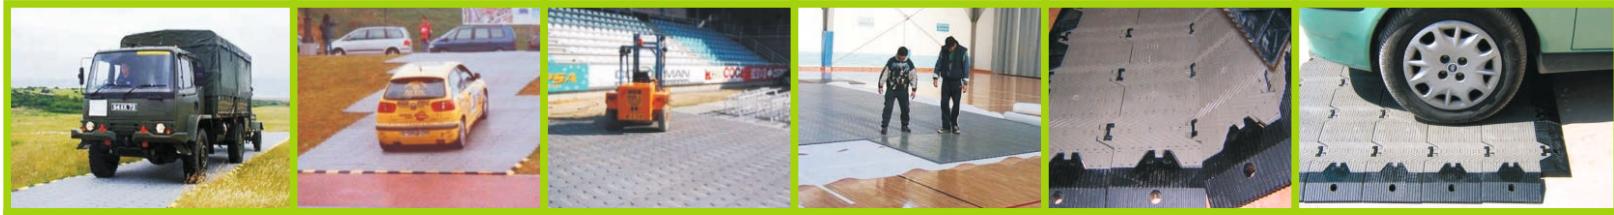

AREAS of USE

- Logistic Parks, rough surfaces
- Walk Paths
- Accommodation Shelter Flooring
- Public Shelter Flooring
- Aid Tent Flooring
- Flexible Water Tank Flooring
- Car – Carwash / Facility / Factory Flooring
- Surfaces with Radioactive Contamination
 - Grass fields, Soil and Sand Surfaces, Asphalt or Concrete Surfaces, all kind of surfaces that require engineering services.

KULLANIM ALANLARI

- Lojistik parklar yüzeyi kötü alanlar
- Yürüyüş yolları
- Konaklama barınak döşemeleri
- Halka açık barınak döşemeleri
- İftar çadırı zeminleri
- Bükülebilir su tankı tabanlarında
- Araç / yıkama elemanları / tesis/ fabrika / orman geçiş tabanlarında
- Radyoaktif kirliliği olan tabanlarda
- Çim sahalarda, toprak ve kum zeminlerde, asfalt veya beton zeminlerde, mühendislik hizmeti gerektiren tüm yüzeylerde kullanılır.

Helikopter pistleri, otoparklar, arazide araç yolu, yarış pistleri, fuar alanları ve parke kaplı spor salonlarına kolaylıkla kaplanır ve sökülebilir. Konser alanlarına, zarar görmemesi gereken çim alanlara, futbol sahalarına, gösteri merkezlerine, alışveriş merkezlerine, plajlara, askeri kamp bölgelerine ve daha birçok alana kolaylıkla kurulur ve sökülür.

Easily applied on and removed from Helicopter Pads, Car Parks, Car Passage Roads in Field, Race tracks, Fair Grounds and Fitness Centers with floorboards. Easily applied on and removed from concert areas, fields where grass needs to be protected, football fields, performance halls, malls, beaches, military camps and many other fields with different needs.

CMRX[®] **TREME**

The logo features the word "CMR" in a dark gray sans-serif font. To its right is a large, stylized orange letter "X". A white silhouette of a person climbing a wall is positioned on top of the "X". To the right of the "X" is the word "TREME" in a bold, orange sans-serif font. A registered trademark symbol (®) is located at the top right of the "X".

362	KAYKAY PARKLARI	SKATEPARKS	362

İp parkurları, eğlenceli ve zorlu bir ortamda, heyecan, adrenalin ve başarı duygularının üst seviyede yaşandığı 7'den 70'e tüm bireylerin kullanımına uygun oyun alanlarıdır. Fiziksel, zihinsel ve psikolojik bazı zorlukları içinde barındıran ip parkurları; katılımcı bireylerin, strateji geliştirme, kendine güven, cesaret geliştirme, deneyerek ve yaşayarak öğrenme, zorlukları aşma becerisi, dayanıklılık, yükseklik korkusunu yenme, iletişim yeteneğini geliştirme, problem çözme, kendi sınırlarını öğrenme, rekabet edebilme, risk alabilme ve odaklanma, yoğun stres altında çalışma gibi yeteneklerini geliştirmenin yanı sıra dostluk arkadaşlık ortamını da güçlendirir.

İp parkurları, kurulum ve kullanım açısından çeşitlilik gösterir ve eğitim, eğlence, antrenman ya da terapeutik rekreasyon amaçlar için kullanılabilirler. İp parkuru aktiviteleri, işlenenler tarafından kontrol edebilecek bazı riskler içerir.

Bu riskler dikkatli denetim, eğitim, yönlendirme, bilgilendirme vs. ile ortadan kaldırılabilir. İp parkuru aktiviteleri, yalnızca, işlenen belirttiği güvenlik koşullarını uygulayabilecek fiziksel ve zihinsel yeterliliğe sahip olan kişiler tarafından yapılmalıdır.

İp parkurlarında kullanılan güvenlik ekipmanları toplu ya da bireysel olabilir. Bu güvenlik sistemleri ve ekipmanları, düşme veya çarpışma benzeri kazaları sınırlamak ve en aza indirmek için tasarlanmıştır.

İp parkurları ile ilgili doğal riskler bulunmaktadır. Bu riskler ip parkuru işletmecileri ve personeli tarafından yönetilebilir ve en aza indirilebilir, ancak yine de tam olarak ortadan kaldırılamayacakları bilinmelidir.

Cemer Kent Ekipmanları olarak ürettiğimiz tüm ip parkurları En15567 Avrupa standartlarına uygundur.

It is time to try something different to get you out of the house and getting some exercise. High rope courses may not be the first thing that comes to mind when thinking about ways to get some exercise, but it could be just the activity you are looking for. Your body will get a full workout, and your mind will thank you for it too.

High rope courses are a fun and exciting way to get outdoors and get some exercise, something that many of us lack enough time for in our modern lives. Finding an energetic activity that you actually like to do means that you will not see it as a chore that you have to do, but instead something you genuinely want to do. Your body will benefit from an all-round workout while navigating a high ropes course.

You will raise your heart rate significantly while overcoming the obstacles on a high rope course, and the element of risk will make your heart race even faster. Next, let's consider the use of muscles. Your upper body strength will improve with regular sessions on a high rope course, and this is where most of the work takes place. Your hands, arms and shoulders will all be aching after your first time, but your muscle strength will improve dramatically over the space of just a couple of months if you take on a high ropes course twice a week.

Try to the high ropes course. Being high up in the air, you will need to stay focused, balanced and concentrate on completing the obstacle at hand. Your balancing muscles are located in your back, abdominals and along your spine and many recreational activities overlook these muscle groups. Strong core muscles will help you stay flexible, injury-free and well-balanced.

Besides individual satisfaction, negotiating a high ropes course with a group or your team can have some great mental health benefits too. Leadership skills can be realised in someone who never thought they had them and the whole team can learn to trust one another more when they help one another to conquer their fears.

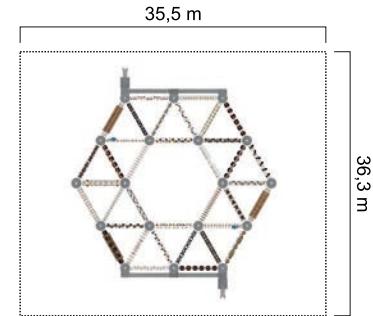

The great thing about the high ropes is that anyone can do it, young and old and it provides a fun way to get fit. A healthy body and mind is something that everybody has the right to deserve, being surrounded by nature, exercising both your body and mind and having fun doing your body.

The wide ranging physical and mental health benefits of completing high rope courses make them a perfect activity for anyone who wants to get into and stay in shape. A fun activity that is as good for your body as it is for your mind, if you are looking for a way to improve your fitness and boost your confidence then reach for the elements and try a high ropes course.

Yenilikçi modern ve aktif bir kimliği olan tırmanış sporu, tüm dünyada yeni yüzyılın sporu olarak kabul edilmektedir. Tırmanma duvarı, çelik konstrüksiyon üzerine yerleştirilmiş polyester paneller veya kontrplan üzerine monte edilen tutamaklardan oluşur. Tırmanma duvarını oluşturan polyester ve kontrplak panellerin eğimi bu paneller üzerine monte tutamakların açları boyaları ve uzaklıkları ayarlanacak, her seviyeden tırmanıcı için zorluk dereceleri farklı bir rota yapılabılır.

Tırmanma duvarları, doğal tırmanış yapmanın sınırlı olduğu yerlerde dağcılık ve tırmanış yapmanın sınırlı olduğu yerlerde dağcılık ve tırmanış antrenmanları yapmak için ortaya çıkmıştır. Sonrasında tırmanma duvarlarını yetişkin ve çocuklar olmak üzere bu spora ilgi duyan tüm bireyler kullanmaya başlamıştır.

Faydalari

Tırmanış denilince insanların aklına ilk gelen şey güç ve kuvvet gerektiren bir spor olduğu zannedilmesidir. Aslında tırmanış, güchten önce, denge, esneklik, karar verme, özgüven ve azimle başlar. Tırmanışın tüm insanlar ve özellikle çocuklar üzerinde bir çok olumlu etkileri vardır. Tırmanan kişinin

neredeyse tüm kas grupları çalışır. Dağcı ve spor tırmanıcı kişiler üzerinde yapılan araştırmalara göre, sürekli ve düzenli yapılan tırmanışlar insanların baskı altında doğru ve hızlı karar verebilme, stres yönetimi, yükseklik korkusunu yenme, zor koşullara dayanıklılık, sorunları çözüme, strateji oluşturma, planlama, sosyalleşme, özgüven, pratik zeka ve mental gücünü arttırdığı ortaya çıkmıştır. Tırmanan bir çocuk tırmanırken nereye basacağını, hangi tutamağı tutacağını aklında kurgular ve tırmanırken bunları uygulamaya çalışır. Yüksekçe atılan her bir adım, çıkan her bir metre, çocuğun özgüvenini sağlamlaştırır ve her defasında bir adım daha ileriyi hedefler.

Güvenlik

UIAA Uluslararası Tırmanış ve Dağcılık Federasyonu onaylı, EN ve CE standartlarına uygun KKE "Kişisel Koruyu Ekipmanlar" ve emniyet malzemeleri kullanılarak yapılan tırmanış düşünülenin aksine minimum riski olan bir spordur. Tırmanış her türlü güvenlik önlemleri alınarak %0 risk oranı ile yapılır. Bu yüzden diğer spor dallarıyla karşılaştırıldığında tırmanış, risk oranı en düşük sporlardan birisidir.

Sport climbing which has modern, innovator and active identity is accepted as sport of the new century in the World. Climbing wall is formed by holds placed on polyester or plywood panels and this polyester panels or plywood panels are build on steel constructions. For each level of user many routes in different difficulty levels on these walls can be created by adjusting number or dimension in-between holds and changing aim of the wall.

Climbing walls has come up to practice climbing where there is not much availability of traditional climbing activities. Afterwards all people interested in this sport including adults and children started to use.

Benefits

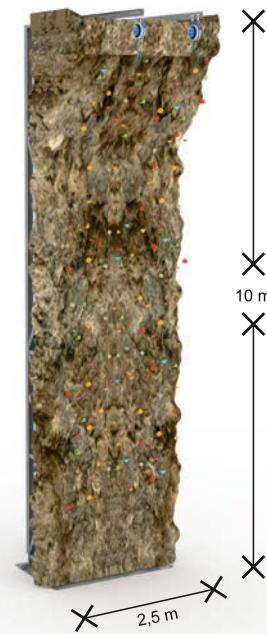

When it comes to climbing it is commonly supposed that this sport requires strength and power first. Actually before power and strength, climbing starts with balance, flexibility, decision making, self confidence and determination. Climbing has positive effects on users especially children. Climbers work out each muscle group in their body. After some researches on climbers, it come

out that people keep in climbing training has better accurate and quicker decision making under pressure, stress management, overcome with acrophobia, endurance to hard circumstances, problem solving, making strategies, planning, socializing, self confidence, ingenuity and increase in mental power. A climbing child first plans where to hold where to step then executes plan accordingly. Every step higher, every meter climbed a child gains more self confidence and with each step always aims higher.

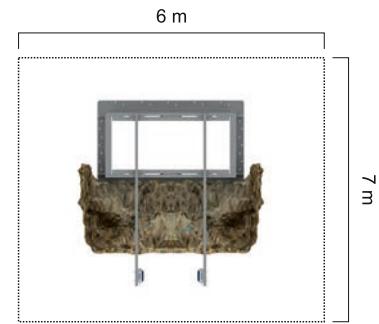

Safety

Climbing with safety equipment and "Personal Protective Equipment" according to EN and CE standards and accredited by IFSC(International Federation of Sports Climbing) has minimum risk contrary what is believed. With all safety measurements climbing can be executed with zero risk. That's why if you compare sports climbing with other branches of sports it is among the lowest risk sports.

Zipline, Çin, Kosta Rika ve Avustralya'nın uzak ve dağlık bölgelerinde yaşayan köylü ve işçiler tarafından, yüksek geçilmesi imkansız dağlık alanları, nehirleri, yağmur ormanlarını, kanyonları geçmek, malzeme taşımak ve yerleşim alanlarına daha kolay ulaşım sağlamak amacıyla icat edilmiştir. Maceraperstlerin zipline'ı farketmesinden sonra hızla büyüp gelişen ve macera turizmi aktivitesi haline gelen Ziplining 1990'lı yılların ortasından bu yana tüm dünyada populeritesini hızla arttırmış ve tüm dünyaya yayılmıştır. Günümüzde zipline; sahil ve dağ otelleri, macera parkları, ip parkurları ve kano turlarının vazgeçilmez outdoor aktivitesi haline gelmiştir. Macera parkları ve ip parkurlarında yüksek oyun elementi olarak kullanılan Zipline, adrenalin, heyecan hız, korku duygularını aynı anda yaşatır. Aktif kalmak yükseklik korkusunu yenmek ve çevreyi kuşbakışı seyretmek isteyen her yaştan kullanıcıya uygun bir aktivitedir. Farklı uzunlukta ve yüksekliklerde kurulabilen zipline hatlarında mesafe ve yükseklik arttıkça adrenalin heyecan ve eğlencede aynı oranda artar.

Using a zip-line can be quite exciting, especially if it is long as people can built up quite a head of steam, travelling very rapidly along the zip-line. Because zip-lines come in an array of lengths and heights, it is possible for people of all ages to enjoy zip-lines, from young children who might prefer a short, low, backyard zipline to experienced adventurers who want something a bit more exciting. Ropes courses and orienteering challenges often have zip-lines as well, of varying lengths and heights. A zip line is used in a range of sports from mountaineering, to sport climbing, technical tree climbing and water crossing.. Adventure challenge or ropes courses have zip lines as part of their high ropes elements. Ziplining is a great way to stay active, observe nature and have the time of your life. Even if you have a fear of heights, you can face them with ease (going down each zip line 100% secure). I wasn't sure if I would like zip-lining, but now I'm hooked! The best thing is that zip-lining is an easy way to exercise and have fun. You don't need to be a fitness buff to do it; it is an activity open to all ages! Zip-lining is a smooth and exhilarating way to observe nature with a bird's-eye view, so why not try it?

Dünyada olduğu gibi Türkiye'de de Zipline ve Motorlu Zipline (CEMERLINE) popüleritesini hızla artırmaktadır. Son zamanlarda ülkemizde Zipline'a ve eğlence atraksiyonlarına olan ilgi hızla büyümektedir. Günümüz dünyasında insanlar için eğlence artık bir lüks olmaktan çıkip, zorunluluk haline gelmiştir. Her gün yeni bir eğlence merkezi açılmakta ve insanlar Zipline çeşitleri başta olmak üzere değişik aktivitelerden yararlanmak için bu merkezleri ziyaret etmektedirler.

1) Verimlilik ve İşçilik

CemerLine kullanmak ve binmek için bir ekip gerekmez. Tek bir operatör sürüsü güvenliğini sağlamak için yeterlidir.

Tek bir yerden iniş ve biniş sağlanabilir. Güvenli çift kişilik oturma sepeti ile biniciler benzersiz olan ters kaldırma sistemi ile çekilir. Bir operatör; kullanımı ve binicilerin güvenliğini sağlayabilir. Cemerline ekipmanlarının muayeneye ve bakıma ihtiyacı yoktur. Binicilere eğitim vermeye ve koçluk yapmaya da ihtiyaç yoktur.

2) Güvenlik Kaygıları

Cemerline yoğun insan kalabalıklarından oluşan hataları, eğitim almış bir operatörle ortadan kaldırır. Binme işleminden önce, güvenliği sağlamak için elektronik ortamda kilitleme sensörlerle sağlanır ve monitör ile takip edilir. Cemer patentli yay frenleme sistemi her döngüsünde güvenli ve rahat bir iniş sağlar.

The popularity of Zipline and Motor-Zipline (CEMERLINE) is rapidly increasing all over the world just as in Turkey. Recently, interest in Zipline and entertainment attractions in our country is growing rapidly. In today's world, entertainment for people is no longer a luxury, it has become a necessity. A new entertainment center is opened every day and people visit these centers to enjoy various activities, especially the Zipline systems

1) Productivity and Workmanship

No team is needed to use and ride CemerLine. A single operator is enough to ensure ride safety.

Landing and boarding can be performed through one place. Safe double seating vehicles, are drawn with a unique reverse lift system. An operator can use the system and ensure the safety of riders. Cemerline equipment does not need inspection and maintenance. There is also no need to train or instruct riders.

2) Security Concerns

Cemerline eliminates the mistakes that will arise from the crowds of people with an educated operator. In order to ensure safety, locking is performed electronically prior to boarding and is monitored through the ride. Cemer's patented spring braking system ensures a safe and comfortable stopping on every cycle.

3. Ride cycle time in Cemerline

Cemerline allows users to board and get off at ground level. Users are not required to climb up the stairs or a tower to reach the starting point. With an operator of normal standards, each line with an average length allows 60 people (30 cycles) to use the cemerline per hour.

4. Access and Size

The height and length of Cemerline can be designed according to the user's needs and it can be built on buildings, structures, mountain slopes or cliffs. Cemer can provide stations between 20 and 60 meters in height where such heights are not present. The length of use is between 90 and 210 meters. A single ground-level area is sufficient to ensure that guests can get on and off the ride on the ground and eliminates the need for climbing.

5. Age and Height-Weight Restrictions

The excitement with Cemerline is doubled because it is shared with someone else. Cemerline provides entertainment for 2 people at a time. Cemerline's unique design two-seater vehicles are not limited to any age, height or weight.

Hava bisikletinde, araç başına isterseniz 1-2, isterseniz 1-4 sürücülü seçeneklerin yanında, 2 raylı hat kurarak 2 şeritli rayda eş zamanlı çiftli sürüş imkanı bulunduğundan kullanıcılar birbirleriyle yarışma şansı da sunabilirsiniz.

Günümüz parkları; macera parkurları, buz ve kayak pistleri, elektronik oyun parkları gibi işletmeye olanaklı , gelir getirişi yüksek ürünlerle donatılmaktadır. Biz en basit şekilde size yepyeni bir gelir kaynağı oluşturma şansı sunuyoruz. Hava bisikleti ile misafirlerinize Hezарfen gibi uçmanın heyecanını sunarken, geliriniz ve yatırımınızın değerini de katlayacaksınız.

Kısacası, özel tasarım ve teknolojisi ile her yaştan tüm misafirlerinize, yere yakın sakin bir uçuştan inişli çıkışlı ve yüksekte adrenalin dolu bir uçuşa kadar farklı alternatifleri sunabileceğiniz bu ürün ile, eğlence ve tercih edilirliğinizi artırma garantisi sunmaktayız.

Hava bisikleti ile uçma hissini sınırsızca yaşayacaksınız. Yükseltilmiş yol sistemi ile, istediğiniz yükseklikte ve rotada yollar tasarlayabilir, adrenalin tutkunlarından, sakinliği tercih edenlere kadar farklı misafirler için farklı senaryolar üretebilirsiniz. Cemer olarak size, hava bisikleti ile, kullanıcılarının daha önce yaşamadığı heyecan ve deneyimi tattıracak, farklı ve özgün olması nedeniyle de siz rakiplerinizin önüne geçirecek, bir ürün sunuyoruz.

On the air bike, in addition to 1-2 or 1-4 riders per vehicle choice, you can also provide the users with a chance to race each other by constructing a 2-rail track which enables simultaneous riding on 2 rails.

Today's parks are equipped with high-yield products, such as adventure trails, ice rinks and ski tracks, electronic playgrounds. We offer you the chance to create a brand-new source of income in the simplest form. With the air bike, you will multiply the value of your income and investment while providing your guests with the thrill of flying freely like a bird.

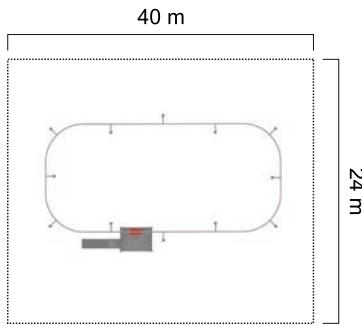

In short, with this product by which you can offer your guest from all ages different alternatives from a peaceful low-level flight to an adrenaline filled flight with climb and drops at high altitude, we promise you to boost your attractiveness.

You will experience the feeling of flying with an air bike with no limits. With the elevated road system, you can design roads at any height and course you want, and create different scenarios for different guests, from adrenaline enthusiasts to those who prefer calmness.

As Cemer, we offer you a product that will make the users enjoy the excitement and experience that they have never experienced before and give you the upper hand against your competitors.

Skate parklarımızın planlama, tasarım ve uygulaması, deneyimli ve uzman ekipler tarafından yapılmaktır, uzun ömürlü kullanım ile güvenlik ön planda tutulmaktadır. Tüm çelik aksamlar sıcak daldırma galvaniz yöntemiyle üretilmiştir. Ürün korkulukları 1,5" kenar boruları ve 1,5" boru konstrüksiyonlarından oluşturulmaktadır. Kullanıcılarının serbestçe kayarak eğlenceleri, sosyalleşmeleri ve yeteneklerini geliştirmeleri amacıyla özel olarak tasarlanmıştır. Kaykay platformlarımızın kayma yüzeylerinin beton sınıfı C40, diğer kısımların beton sınıfı ise C30'dur. Kaykay platformlarımızın inşaat demiri sınıfı St III A'dır. (Doğal sertlikte, üstün kaliteli çelik).

Kaykay Platformlarımızın kayma yüzeylerinde; beton parafin esaslı buharlaştırma azaltıcı kür malzemesi kullanılmaktadır. Bu işlem sayesinde yüzey direnci artırılmaktadır. Kaykay platformlarımızın Rampa kenarlarında 40*40*4 köşebentler kullanılmaktadır.

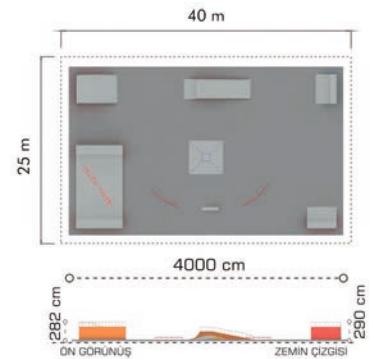

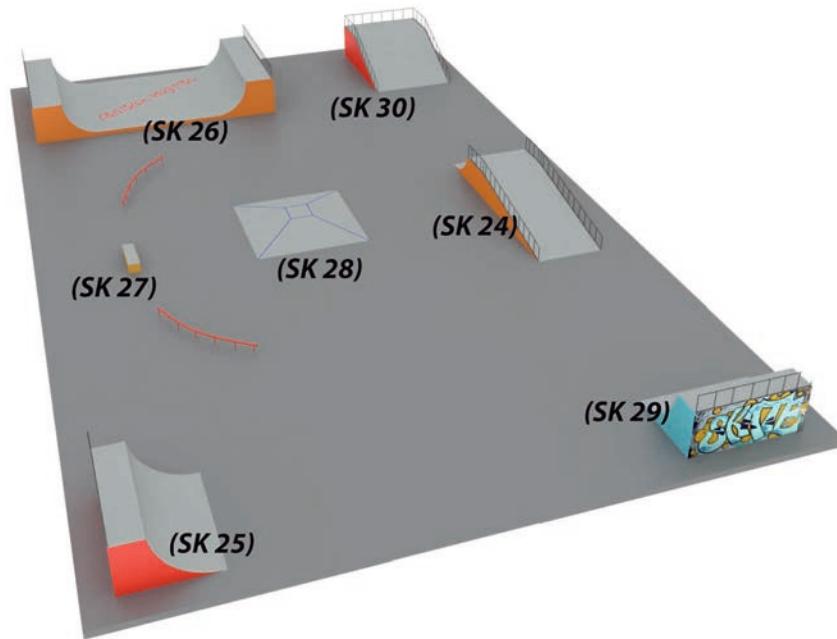

Planning, design and installation of our skate parks are made by experienced and expert teams, and safety and long life-cycle is top priority. All steel components are produced by hot dip galvanizing method. Product guard railings consist of 1.5" side pipes and 1.5" pipe constructions.

*They are designed specifically for their users to freely skate, socialize and improve their abilities. The skating surfaces of our skateboard platforms are concrete class C40 and the other parts are concrete class C30. The reinforcing bar class of our skateboard platforms is St III A. (Natural hardness, high quality steel). A concrete paraffin-based evaporation reducing material is used on the skating surfaces of our Skateboard platforms. This application increases the surface durability. 40 * 40 * 4 brackets are used at the ramp edges of our skateboard platforms.*
