Atentie, aceste echipamente sunt produse in Europa ceea ce inseamna ca sunt conforme cu standardele legale - EN14960.

Multe echipamente produse in Asia nu au certificare legala si unele nu respecta standardele de securitate in vigoare.

Gonflabilele sunt confectionate din PVC - Tarpaulin. Pentru o rezistenta marita si pentru a nu se deforma in timp, invelisul de PVC este turnat peste o insertie textila foarte rezistenta. Aceasta insertie este pretensionata, pentru ca materialul sa se pastreze mereu neted.

Materialul si ata din cusaturi nu putrezesc la o utilizare normala, insa daca patrunde umezeala in interiorul instalatiei gonflabile si aceasta este depozitata inainte de a se usca complet, se poate instala mucegaiul, generand mirosuri neplacute si pete pe material care nu se mai pot sterge. Acest mucegai inasa nu va afecta rezistenta sau structura materialului si a cusaturilor.

Materialul este impermeabil. Singurul loc pe unde se poate infiltra apa este pe la imbinarile cusute. Din acest motiv, este recomandat ca pe timp de ploaie sa fie acoperit materialul cu o prelata impermeabila. Colorantul folosit este inofensiv, nu contine substante toxice.

O proprietate importanta a materialului este aceea ca inhiba arderea, adica daca sursa ce a generat flacara dispare, materialul se autostinge. Aceasta proprietate este denumita "Fire Retardant" in literatura de specialitate.

Firma Loftek SRL este distribuitor autorizat al producatorului in România. Listele de pret se pot schimba fara notificare prealabila. Pentru a avea o oferta valabila pe un anumit termen trebuie sa trimiteti o solicitare prin email (gasiti datele pe site in pagina de contact - nu o afisam aici datorita motoarelor de cautare pentru spam)

Distribuim si utilizam echipamente gonflabile din 2006. Va recomandam cu caldura aceste echipamente moderne.
 Va putem asigura si personalizarea culorilor si a graficii contra cost.
