EyePlay Exergame Surface

Interactive Surface Size:
Up to 18'x14'

Includes:
EyePlay Hardware Kit: Over 50 games to choose from included game titles: Solar System, Ice Hockey, Football, Candy World, Monsters, Coloring Book, Protect Your Planet, Cheese Heist, Fire Crackers, Capitals, Bubblies, Maze, Frogz, Disco Floor, Piano, Underwater, Drums, Super Soccer, Balloons, Hatch, Ball Pit).

Basics:
EyePlay systems use a horizontally positioned projector and an angled mirror to apply the projected image on to the floor. The projection size and brightness are affected by the ceiling height and the projector specifications according to the following paragraph.

Floor/Wall requirements:
A smooth, non-reflective, non-glossy, bright (preferred white) surface of any kind is required (can be marble, wood, special Vinyl flooring etc.) The size of the flooring depends on the projection size as described above.

Power requirements:
Standard 110-240v input, three sockets required as a minimum.

Internet connection requirements:
Ethernet Cable UTP Cat.5 with RJ45 Male connection (preferred) or a stable wireless connection.

Installation methods:
Drop ceiling: The unit will replace the central floating ceiling tile and will rest on its original frame, above the exact middle of the required projection area. The anchorage to the real ceiling is done using bolts and wires or chains, according to the ceiling quality or material.

Standard ceiling or external structure:
The unit will be hung as a "Stand alone" device. The anchorage to the ceiling is done using standard mounting pole. The anchorage to external structures as booths is done using wires, cables and chains.
