

DRY SLIDES AND AMUSEMENT RIDES

No matter which of our products you choose – one thing is certain: you will find the highlight for your leisure facility or adventure park with us. From dry slides for our little ones, to event slides in malls or on cruise ships, to the many other rides in our range – we will be there to guide you from the initial idea to the finished crowd puller.

WIEGAND.WATERRIDES

Wiegand is a leading waterslide manufacturer and a reliable partner worldwide! Different combinations of material and fascinating special effects make our innovative slide creations distinctive and unique – from kids slides and spray parks to spectacular giant raft slides in major water parks. Contact us for an offer to suit your requirements: +49 (0) 81 51 971-330 | info@wiegandwaterrides.de

ALPINE COASTER

THE PREMIUM CLASS OF ALL-WEATHER TOBOGGAN RUNS

Our toboggan runs guarantee riders of all generations an excellent experience as they ride in total safety. The well-designed vehicles come with two individual seat belts with safety lock. As with the classic summer toboggan run, the guest sets his own speed.

With over 270 systems in more than 40 countries, our Alpine Coaster is the best-selling toboggan run type worldwide. The huge realistic transport capacity of 500 pph plus the all-weather suitability of the Wiegand Alpine Coaster generate high turnover for you as the operator all year round.

Year-round operation even in wet or low temperatures

Space-saving storage system with one-man operation.

A clear view and breath-taking ride, as the use of safety nets can be significantly reduced.

ALPINE COASTER 2.0

THE LATEST GENERATION OF OUR TOP SELLER

With the Alpine Coaster 2.0, the latest development in the field of toboggan runs from Wiegand is now on track. The comfort vehicles are even larger and offer comfortable space for two adults, even with ski boots. In addition, the bodywork of this type can be designed in several colours or as multi-colour design.

The Alpine Coaster 2.0 also features some technical changes compared to its predecessor; for example, in addition to the front lighting, a rear light has now been fitted as standard. The technology of the brakes has also been changed. The absolutely wear-free eddy current brake offers a considerable advantage over other toboggan runs.

And when can we look forward to seeing you on our fantastic toboggan runs?

MADE IN GERMANY

A highly complex driving assistance system prevents congestion on the track, thereby leading to a higher utilization.

THE FACTS

ALPINE COASTER AND ALPINE COASTER 2.0

ECONOMIC BENEFITS

- Realistic capacity: 500 pph
- Low maintenance
- Payback time from 2 years

Further uphill transport options

- T-bar or chairlift, independent toboggan transport system

SITE CONDITIONS

- Min. 30 m height difference
- Max. 70% terrain gradient

Pure tobogganing adrenaline

Lift system with connected double helix

SUMMER TOBOGGAN RUN

PROVEN FOR DECADES - THE TROUGH-SHAPED CLASSIC

The trough-shaped summer toboggan run, colloquially also called a tub or gutter run, is „the mother“ of all our toboggan runs and continues to thrill tobogganing enthusiasts all over the world.

The descent through steep curves, small jumps, curved and straight segments of the built-in track is like a fast ride through an ice channel in bobsleigh racing, with bridges and helixes completing the experience.

Take a test drive - you too will be thrilled!
